Regional Sales Performance Analysis

Business Requirements Document (BRD)

---

1. Business Objective

The objective of this project is to analyze **regional sales performance for Acme Corporation across the United States** in order to identify key revenue drivers, profit trends, seasonal demand patterns, and operational inefficiencies.

The dashboard aims to help business stakeholders:

- Monitor **overall sales performance**
- Identify **high-performing regions and products**
- Track **profitability and margins**
- Detect **seasonal demand fluctuations**
- Compare **actual sales vs business targets**
- Support **data-driven strategic decisions**

This solution enables leadership teams to improve:

- Sales strategy
- Product portfolio decisions
- Regional resource allocation
- Demand forecasting
- Pricing and profit optimization

---

2. Scope of the Report

In Scope

- Regional sales performance analysis
- Product category and product-level analysis
- Profitability analysis
- Time-based sales trends
- Budget vs Actual sales comparison
- Customer and channel performance

Out of Scope

- Inventory management analysis
- Supply chain logistics analysis
- Marketing campaign attribution
- Customer lifetime value modeling

---

3. Key KPIs & Definitions

KPI	Definition	Formula	Example Use
Total Revenue	Total sales value generated	SUM(Sales Amount)	Measure overall business performance
Total Profit	Net profit generated after costs	SUM(Profit)	Evaluate business profitability
Units Sold	Total number of products sold	SUM(Units Sold)	Measure sales volume
Profit Margin	Profit percentage relative to revenue	(Profit ÷ Revenue) × 100	Assess profitability efficiency
Average Selling Price	Average price per unit sold	Revenue ÷ Units Sold	Pricing analysis
Sales Growth	Change in sales over time	(Current Period Sales − Previous Period Sales) ÷ Previous Period Sales	Measure growth trends
Regional Revenue	Revenue generated per region	SUM(Sales Amount) by Region	Identify strongest markets
Product Revenue	Revenue generated per product	SUM(Sales Amount) by Product	Product performance evaluation
Budget Achievement	Comparison of actual sales vs budget	(Actual Sales ÷ Budget) × 100	Performance vs targets

4. Dashboard Visual Requirements

1. Regional Sales Distribution — Map

A **map visualization** will display revenue distribution across U.S. regions.

Purpose

- Identify geographical sales performance
- Detect high-revenue markets
- Support regional strategy planning

Visualization Logic

- Location → Region / State
- Metric → Total Revenue
- Bubble Size → Sales value

---

2. Monthly Sales Trend — Line Chart

A **line chart** will visualize sales performance across months.

Purpose

- Identify seasonal demand patterns
- Detect revenue fluctuations
- Track long-term sales growth

Visualization Logic

- X-Axis → Month
- Y-Axis → Revenue
- Optional Filter → Year

---

3. Product Performance — Bar Chart

A **bar chart** will highlight top-performing products.

Purpose

- Identify best-selling products
- Understand product contribution to revenue

- Optimize product strategy

Visualization Logic

- X-Axis → Product
- Y-Axis → Revenue

---

4. Profitability Analysis — Scatter Plot

A **scatter plot** will analyze product profitability.

Purpose

- Compare revenue vs profit margin
- Detect low-margin high-volume products
- Identify profitable product segments

Visualization Logic

- X-Axis → Revenue
- Y-Axis → Profit
- Bubble Size → Units Sold

---

5. Budget vs Actual Sales — Column Chart

A **column chart** will compare actual sales against business targets.

Purpose

- Monitor performance against targets
- Identify underperforming regions or products
- Improve financial planning

Visualization Logic

- X-Axis → Region or Product
- Y-Axis → Sales Value
- Columns → Actual vs Budget

---

6. Category Contribution — Donut Chart

A **donut chart** will show revenue distribution by product category.

Purpose

- Identify major revenue contributors
- Understand category dominance
- Guide inventory and marketing strategies

---

7. Profit Margin by Region — Matrix Table

A **matrix visualization** will display profit margins across regions and products.

Purpose

- Compare regional profitability
- Identify low-margin markets
- Support strategic pricing decisions

---

5. Filters and Interactivity

The dashboard will allow users to filter by:

- Year
- Region
- Product Category
- Product
- Sales Channel

This enables dynamic analysis and deeper exploration of sales performance.

---

6. Expected Business Outcomes

The dashboard will help the organization:

- Identify **high-growth regions**
- Focus on **high-profit products**
- Improve **pricing and margin strategies**
- Optimize **regional sales planning**
- Enable **data-driven decision making**
